

BETTINA GEORGE

gobetti@unc.edu | (919) 923-5992 | [linkedin.com/bettina-george](https://www.linkedin.com/bettina-george) | github.com/BettinaGeorge | Chapel Hill, NC

EDUCATION

University of North Carolina at Chapel Hill | Chapel Hill, NC

Graduating May 2027

Bachelor of Science in Computer Science & Information Science, Entrepreneurship Minor

GPA: 3.79 | Dean's List

Relevant Coursework: Data Structures & Algorithms, Intro to Programming/Data Sci., Object-Oriented Programming, Discrete Math, Calc. I/II, Linear Algebra, Intro to Cybersecurity, Modern Web Programming, Computer Organization, Intro to DB Concepts/Apps, Info Systems Analysis and Design, AI/ML Foundations, Algorithms and Analysis, Foundations of Software Engineering

SKILLS AND INTERESTS

- **Programming Languages:** Python, Java, C, SQL, HTML/CSS/JavaScript/TypeScript
- **Frameworks & Libraries:** React, Node.js, Next.js, Angular, Flask, Pandas, NumPy, Seaborn, Matplotlib
- **Technologies:** Git/GitHub, Docker, CLI, Tableau, DBeaver, Supabase, Drizzle, RESTful API, Jira, Figma, Adobe Creative Suite, Canva

RELEVANT EXPERIENCE

KPMG + Break Through Tech | AI/ML Fellow

May 2025 - Present

- Built and evaluated supervised machine learning models in Python (pandas, scikit-learn) on real-world productivity and energy datasets.
- Developed an optimization system (NSGA-II) to quantify trade-offs between generative AI productivity gains and energy consumption.
- Analyzed model outputs and translated metrics into actionable insights for stakeholders to support responsible, scalable AI deployment.

UNC Department of Computer Science | Undergraduate Teaching Assistant (COMP 110)

Aug 2025 - Present

- Selected from 180+ applicants to mentor students in Python, debugging, & SDE in an introductory programming course.
- Led weekly labs/office hours as a technical point of contact, diagnosing issues and communicating complex concepts under time constraints.

Lowe's Tech Hub | Software Engineering Intern

May 2025 - Aug 2025

- Refurbished a React/TypeScript/FastAPI internal platform for 1.5K+ staff, improving system reliability and reducing navigation errors.
- Collaborated with product managers, engineers, and designers in Agile sprints, balancing performance, data integrity, and access needs.
- Used DBeaver to validate PostgreSQL queries and debug schema issues, ensuring data consistency and preventing faulty propagation.
- Ensured 95%+ test coverage via Cypress to proactively catch regressions and reduce risk of production failures.

UNC School of Government | Instructional Tech and Design Support Analyst

Aug 2024 - Present

- Designed and delivered interactive content for 500+ students using Canva LMS, Articulate Rise, Adobe Suite, and HTML/CSS.
- Automated feedback analysis with Python to surface trends/operational gaps, improving visibility and accelerating content updates by 32%.

Beats by Dre | Customer Trends Research Extern

Jul 2024- Aug 2024

- Led end-to-end research projects supporting product development using Python, Tableau, and Excel for data analysis and visualization.
- Guided product direction by automating data collection workflows and sharing customer insights through reports and presentations.

PROJECTS

Quiet Table | Pearl Hacks Hackathon 2026

[Project Link](#)

- Won 1st Place at Pearl Hacks 2026 for building a privacy-first, real-time dining connection app with ephemeral, no-profile interactions.
- Implemented geospatial proximity matching with MongoDB 2dsphere indexes and Google Maps API for real-time location discovery.
- Led frontend development in Next.js/TypeScript and collaborated on Node.js/Express APIs for real-time flows and Gemini-powered icebreakers

AI-Driven Creator Content Intelligence Platform | Full-Stack

[Project Link](#)

- Built a full-stack platform using FastAPI, Next.js/TypeScript, and PostgreSQL to analyze Instagram Reel performance and guide content strategy.
- Engineered a pluggable ingestion layer parsing Instagram Reel JSON exports into PostgreSQL, enabling swap to the Instagram Graph API.
- Integrated Anthropic Claude to power AI creator tools (hooks, briefs, strategy insights, trend scouting) using live analytics context;

Duolingo Watch Feature | Duolingo Thrive APM Recruitment 2025

[Project Link](#)

- Designed/proposed a media-based language feature that integrates bilingual subtitles, vocabulary pinning, and interactive annotations.
- Created high-fidelity Figma mockups/UI flows, supported by a mock A/B testing plan to validate increasing user retention/engagement.

De-Impact Web App | JP Morgan Code for Good Hackathon 2024

[Project Link](#)

- Collaborated with 6 others to create a web app that connects civilians with NGOs through a skill/interest-based matching system.
- Designed a seamless, user-centered interface using Figma and implemented the front end using React.js, TypeScript, and Tailwind CSS.
- Assisted in building a 60% matching compatibility algorithm with Java/Spring Boot/MySQL, boosting demo engagement by 25%.

Diaspora Duo App | Pearl Hacks Hackathon 2024

[Project Link](#)

- Led product ideation and UI/UX for an AI-driven web app supporting immigrant transitions through personalized recommendations.
- Developed Figma mockups; collaborated across frontend/backend to deploy an MVP integrating LLM-powered recommendations via Flask APIs.
- Awarded Best DEI Hack by Fidelity and Best Use of AI by Infosys among 70+ competing teams.

LEADERSHIP & ACTIVITIES

- **SEO Career Prep:** Selected for 100+ hours of career coaching and software engineering training.
- **Black in Technology:** Project Development Chair; led technical team and event planning; increased student engagement by 32%.
- **African Student Association:** Events Planning Committee Member & First Year Liaison.
- **Other Memberships:** ColorStack, Rewrite The Code, Codepath, UNC CS+Social Good, AppTeam Carolina, Kappa Theta Pi
